BE A SUPERHERO!

**DON'T LET YOUR
CHILD'S BODY BE A SUPER
VILLAIN'S HIDEOUT!**

SHOTS BEFORE SCHOOL, THAT'S THE RULE

Vaccination is very safe and effective.

Scientists, doctors and other health care professionals only give vaccines to children after a long and careful review.

Vaccines may involve some discomfort and may cause pain, redness, or tenderness at the site of injection but this is minimal compared to the pain, discomfort, and trauma of the diseases these vaccines prevent.

During the early years of life, your children need vaccines to protect them from 14 diseases that can be serious—even life-threatening.

Parents who choose not to vaccinate their own children increase the risk of disease not only for their children, but also for other children and adults throughout the entire community. Indiana State Law requires that all immunizations be current for your child to attend school.
