Welcome

Estelle Rutledge, MD
OB\GYN

Dr. Rutledge practices comprehensive gynecology from puberty to menopause to beyond.

Tip of the Month

Cervical Health Awareness

Cervical cancer screening is used to find changes in the cells of the cervix that could lead to cancer. Screening includes the Pap test and, for some women, testing for human papillomavirus (HPV). You should start having Pap tests every 3 years beginning at age 21 years. At age 30 years until age 65 years, you should have co-testing – a Pap test and a test for HPV – every 5 years (preferred) or a Pap test alone every 3 years. You can stop having cervical cancer screening after age 65 years depending on your health history and results of previous cervical cancer screening tests. (acog.org)

All women should have an annual well-woman examination. This is your time to receive cancer screening and review any other female issues. Dr. Rutledge provides treatment for many conditions, some of her most frequent requests involve:

- ❖ contraception
- ❖ sterilization (Essure non-surgical sterilization available)
- ❖ bleeding problems
- ❖ menopausal medicine
- ❖ adolescent medicine
- ❖ sexual dysfunction
- ❖ bleeding problems
- ❖ breast issues

Dr. Rutledge is accepting new patients.
